- AWESOME TA!!! Very helpful and can explain things so clear!
 - Anton is good at explaining the concepts and makes himself available to students. Overall, a good TA.
 - Anton is just a little behind the course material. It would benefit us much more if he were to go over things currently being discussed in lecture rather than what was discussed last week.
 - Bobkov is an AMAZING TA. He explains topics thoroughly and easily shows anecdotes and applications to make concepts more understandable. He answers questions fluidly and without hesitation, and shows that he really knows his math. He should get a RAISE. Seriously though, he is amazing.
 - Bobkov is so knowledgable and he tries his best to help us understand the material. I really appreciate how he asked for feedback and then responded and improved.
 - Good TA
 - He is a good TA. In discussion, he reviewed what professor had talked and helped us with some homework problems.
 - May be more time should be used to give a general summary of the week's lecture instead of just teaching 3 or 4 questions.
 - The TA is really organized and clear. He makes the material simpler. I strongly believe that he taught me better than the professor. Sometimes he goes over the material ahead of the lecture which is really nice because it makes the lecture easier to grasp.
 - Too quiet. You are allowed to tell others to quiet down. Focused more on what you wanted to talk rather than have our questions answered
