February 15, 2017

To the Academic Hiring Committee:

I am a PhD student in logic at UCLA. I will graduate in June 2017 and would like to apply for a visiting assistant professor position beginning in Fall 2017, as posted on the MathJobs website.

My work at UCLA has exposed me to a variety of teaching techniques which helped me to define and improve a style of my own while addressing the diverse undergraduate student body. I have taught in both first-year calculus classes and advanced undergraduate math classes as well as other areas such as programming and finance. I have worked with a large number of students with different skill levels, majors, and background knowledge. My teaching style has adjusted based on the requirements of the class and of the students. I was honored to receive the 2016 Distinguished Teaching Award from the UCLA Mathematics Department. On top of my teaching duties I was closely involved in mentoring undergraduate students doing independent study. I oversaw a variety of projects guiding and advising the students along the way. I look forward to working at the Macalester College, exchanging ideas with my colleagues and further refining my teaching techniques.

The idea of teaching in a liberal arts college is particularly exciting to me. I value the individual student-teacher bond. It empowers the student to realize their full potential and it allows the teacher to relearn the material from a student's perspective providing valuable insights into where the common misunderstandings lie. I'm really looking forward to an opportunity to work more closely with the students in a setting of a smaller classroom. I strongly believe that it will help me grow as an educator.

My application consists of the AMS cover sheet, my curriculum vitae, my research and teaching statements. In addition, it includes letters of reference from my advisor, Matthias Aschenbrenner, as well as from Artem Chernikov, Olga Radko, and Jukka Virtanen. Dr. Radko's and Dr. Virtanen's letters address my teaching experience.

Please let me know if any of these items is not accessible or if I can provide any further information. Thank you for your time and consideration. I look forward to talking with you.

Sincerely,
Anton Bobkov
