

A Tiny Example

Andrew Mertz and William Slough

June 15, 2005

Suppose we have an infinite collection of sets \mathcal{F} .

We define a shatter function $\pi_{\mathcal{F}}(n)$

$$\pi_{\mathcal{F}}(n) = \max\{\# \text{ of atoms in boolean algebra generated by } S \mid S \subset \mathcal{F} \text{ and } |S| = n\}$$
