A Tiny Example

Andrew Mertz and William Slough

June 15, 2005

Suppose we have an infinite collection of sets \mathcal{F} . We define a shatter function $\pi_{\mathcal{F}}(n)$

 $\pi_{\mathcal{F}}(\mathit{n}) = \max{\{\# \text{ of atoms in boolean algebra generated by } S \mid S \subset \mathcal{F} \text{ and } S \in \mathcal{F} \text{ of all } S \in \mathcal{F} \text{ of atoms } S \in \mathcal{F} \text{ of all } S \in \mathcal{F} \text{ of atoms } S \in$
