Comments Report

2. Comments:

2.1) Please use the space provided for any comments you wish to make which are pertinent to the educational process. These may include all aspects of the course: teaching, examinations, grading, textbook, etc.

- Anton is a great T.A. Sections were always well-organized, with a clear lesson plan and instructive examples. He is very helpful during office hours and explains things very clearly, and we never have trouble getting a hold of him outside of class hours if we have questions. He's awesome!

- Anton was very helpful in-person and often stayed overtime to help us. He answers our questions or googles them later and reports back the next session. He answers emails and shows us a variety of resources and strategies.

- I like our professor is respectful.

- I think Anton is incredibly knowledgable, and fairly distributes his time amongst his students. He was always very quick to respond to emails, never judged a student or showed disinterest in tutoring them if they indicated they were behind. I will say that Anton's teaching style is very computational, everything is clearly organized for the student to better understand, yet his presentation/delivery of course material is stale, verging on monotone. On the whole, I would not say that Anton is an "excellent" TA, but I do think that he is a very strong TA for PIC courses.

- Really great TA with lots of clear examples and always willing to help out with assignments during office hours

- Very high understanding of material. Very open to communication

- You're a good guy - thanks for putting up with my incessant questions and generally disruptive demeanor!
